The water system includes a combined 2.2-million-gallon storage capacity from 5 reservoirs, 3 pump stations, 8 pressure zones, a 325-GPM treatment facility, and approximately 40 miles of water main. The District purchases drinking water from Seattle Public Utilities (SPU) as a member of Cascade Water Alliance and from the City of Renton and operates its own year-round wells and treatment facility.

The sewer system includes approximately 47 miles of sewer main, with 10 lift stations over 13 sewer basins. The District collects and conveys wastewater to the King County Regional System's West Point Plant in the City of Seattle and South Plant in the City of Renton for treatment.
